

# Modular Bulk Charger

## Capabilities

Plan ahead for the growing demands of operations on-the-move with the all-in-one charging versatility of the Modular Bulk Charger. Customizable to accommodate a variety of batteries used across the U.S. Department of Defense (DoD), the Modular Bulk Charger is designed with the highly-sought architecture of the Universal Battery Charger (UBC) and uses the familiar, intuitive interface. Compatible with nearly any military radio system, the Modular Bulk Charger can charge the full swath of equipment at once. Time and durability are uncompromising commodities that are packaged into the convenience of the Modular Bulk Charger, making it essential to the agility of today's operations.

### Operational Advantages:

- Charge up to 40 batteries at once with a variety of modular configurations.
- Operates with AC/DC power to accommodate stationary and mobile demands.
- USB charging ports for up to eight mobile or smart devices.
- Rugged design acclimates to use across the toughest terrains.
- Snap-and-twist attachments remain undisturbed over rough and unpredictable paths.
- Offers fast and simple assessment of charging status through user-friendly LED indicators.
- Expedites charge time: charge 32 handheld radios at once in under three hours.
- Easily tailored per objective with cups designed for each battery family.
